INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No.

V. Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)	Claims	1-15	YES
	Claims		NO
Inventive step (IS)	Claims	1-15	YES
	Claims		NO
Industrial applicability (IA)	Claims	1-15	YES
	Claims		NO

2. Citations and explanations

1. Claim 1 relates to a coupling structure in a mount for a mobile radio terminal for the electromagnetic coupling of HF signals between the antenna of the mobile radio terminal and the mount.
2. Reference is made to the following documents:

D1: US-A-6 134 421 (SANTOS THEODORE R ET AL)
17 October 2000 (2000-10-17)
D2: EP-A-0 999 607 (NOKIA MOBILE PHONES LTD)
10 May 2000 (2000-05-10)
D3: EP-A-0 776 339 (NOKIA MOBILE PHONES LTD)
2 April 1997 (1997-04-02)
D4: US-A-5 668 561 (PERROTTA ALESSANDRO ET AL)
16 September 1997 (1997-09-16)
D5: DE-A-199 15 246 (PHILIPS CORP INTELLECTUAL PTY)
5 October 2000 (2000-10-05)
D6: US-A1-2001/001343 (LOGOTHETIS JAMES) 24 May 2001
(2001-05-24).
3. Document D4 is considered to be the closest prior art for the subject matter of claim 1. D4 discloses a coupling structure in a mount for a mobile radio terminal for the electromagnetic coupling of HF signals between the antenna of the mobile radio terminal and the mount, to which an external antenna

is connected. The coupling structure is multi-layered and comprises a plurality of partial coupling structures arranged in substantially parallel planes.

The subject matter of claim 1 differs therefore from the known coupler in that one of these partial coupling structures consists of two or more differently shaped partial structures designed for different wavelengths.

Document D1 describes a coupling structure in a mount for a mobile radio terminal, in which a second frequency range can be transmitted by means of an additional parasitic coupling element. However, a combination of the two documents would not lead a person skilled in the art to the arrangement and shaping of the partial coupling structures for coupling different frequency bands as claimed in claim 1.

Consequently, claim 1 meets the PCT requirements for novelty and inventive step.

Claims 2-15 are dependent on claim 1 and therefore likewise meet the PCT requirements for novelty and inventive step.
